this book examines the conceptual development of control in the literature of both management and accounting disciplines from 1900 to 1980 in order to portray the development of control concepts over time the chapters are organized into sections relating to the schools of thought from which they emanated and a model of control is constructed to represent each group of concepts and their hypothesised inter relationships having traced the development of control models a comparative analysis of historical development in the two streams of management and accounting literature is undertaken this analysis reveals a pronounced lag of accounting development behind that of management literature the reasons for this are then discussed

beginning with first principles then discussing the origin and evolution of the debate over depreciation capital and income several related topics are addressed in this volume originally published in 1993 these include the allocation problem interest rate approximations issues concerning financial reporting and analysis and the meaning and economic impact of accounting error the underlying themes concern the importance of history and the need for an appreciation of basic concepts and relationships in accounting

study of the significance and function of accounting incl national accounting and public accounting in the process of economic development and in the formation of development policies in developing countries considers ways in which accounting can be made more relevant in such areas as development planning capital formation financial policy and fiscal policy etc discusses the need for standardization and proposes a framework of accounting for economic development bibliography pp 335 to 356
